

Vegelatin®

Vegelatin® is R&T's advanced plant-based soft gel shell system made from modified starch, designed for oil and oil-powder formulations. It delivers reliable stability, strong sealing performance and premium visual appeal as a sustainable alternative to traditional gelatin soft gels.

Vegelatin® Shell Options

All 4 starch-based shells are suitable for use in TGA products

- **Vege**latin® I -modified starch with proven stability; ideal for oil formulas.
- **Vege**latin® II -enhanced system with strong adhesion for oil-powder suspensions.
- **Vege**latin® C -crystal-clear and customisable for premium display.
- **Vege**latin® M-matte finish for an elevated, high-end look.

All shells are made from modified starch, offering a 100% plant-based, high-performance solution for oil and oil-powder systems.

Key Advantages

- 100% plant-based, gelatin-free soft gel solution
- Suitable for oil and oil-powder capsule systems
- Consistent shell strength, sealing and stability
- Customisable appearance for brand differentiation
- Compatible with standard soft gel manufacturing
- Suitable for vegan, Halal and Kosher-friendly products

Innovation by R&T

R&T combines advanced starch modification with soft gel manufacturing expertise to deliver **Vege**latin® as a scalable, compliant and future-ready capsule shell solution for global nutraceutical brands.
