

PhytoDHM®

Premium Dihydromyricetin For Modern Health Solutions

OVERVIEW

PhytoDHM® is a high-purity Dihydromyricetin (DHM) derived from selected *Hovenia dulcis* seeds. With advanced low-temperature extraction and purification, it delivers exceptional potency, purity and stability for supplements, functional beverages and broader wellness applications.

KEY HIGHLIGHTS

- Natural & High Purity: Sourced from select *Hovenia dulcis* seeds with preserved bioactive richness.
- High Potency & Stability: Consistently strong DHM levels with reliable stability.
- Safe & Compliant: Produced under strict GMP and aligned with global quality standards.
- Science Supported: Benefits validated by substantial research.

HEALTH BENEFITS

- Liver Support & Hangover Relief [1-3]: Helps reduce alcohol-related stress and supports detoxification.
- Antioxidant & Anti-inflammatory Protection [4]: Neutralises free radicals and eases inflammatory responses.
- Metabolic Balance [5-6]: Supports lipid and glucose regulation and assists in weight management.
- Neuroprotection & Mood Support [7-8]: Helps protect neurons and promotes better sleep and emotional balance.
- Beauty & Anti-ageing [9-10]: Supports collagen integrity and defends against oxidative skin damage.

APPLICATIONS

Dietary supplements | Functional beverages
Liver and detox formulations | Antioxidant and anti-ageing blends
Mood and sleep products | Metabolic and weight-management formulas.

INNOVATION BY R&T

R&T applies advanced extraction and stringent quality control to ensure the highest purity and consistency of PhytoDHM®. With strong research capabilities and formulation expertise, R&T partners with brands to create premium, science-supported health solutions.
